

South Fayette Township Municipal Authority

900 Presto Sygan Road Bridgeville PA 15017

Consistent with Allegheny County Health Department orders, South Fayette Township Municipal Authority developed a sanitary sewer operation and maintenance (O&M) plan. The approved plan requires that the Authority televise 10% of the 125 miles of public sanitary sewer mains on an annual basis. The approved ACHD plan also calls for the Authority to continue televising sewer laterals connected to the system.

As part of our area wide televising program, sanitary sewer mains in your vicinity are scheduled to be televised within the next 3 weeks. At that time, an attempt will also be made to partially televise each building sewer utilizing a camera launched from the sewer main. This inspection does not replace the comprehensive dye test and lateral inspection required for all property transfers.

Property owners need not be present during this inspection. No property access is required. Authority personnel will be working out of clearly marked vehicles and will have identification.

Contact the Authority office at 412-257-5100 ext. 5 or 6 should you have any questions or concerns, or visit our web site at www.matsf.net for more information regarding this program.
